

Accelerating 'Techno-Leadership' Learning through Digital Simulators

Techno Leadership Learning.

Our simulators addresses the functional competency areas such as *Project Management, Marketing Management, Sales Leadership etc.* Our simulators also focuses on *simulating People Leadership challenges in the technical environment, that gives Delegates a wholistic learning experience.*

Customizable Digital Algorithms.

Our algorithms are customizable to custom-fit the Business requirement, environment and local challenges faced by our Client Organizations. For instance, we recently customized our Agile Project Management Simulator to be made relevant for World Health Organization's non-IT environment.

Assured Value Delivered.

Our aim is to keep the training relevant, practical, and be able to reach more Employees at less 'off-production hours' for lesser cost, and higher impact.

Netpromoter Score of >92pct

All our Delegates have reported highest level of learning engagement and also relevance of learning to their workplace environment leading to accelerated learning transfer.

Axl Learn is an EduTech company that develops digital Training Simulators that are customizable to Businesses, their Environment, People, and Customers, for a collaborative classroom or virtual learning experience.

Virtual or Physical Classroom Experience.

Our Simulators are best experienced when Delegates form teams of 2 or 3 each to make collaborative decisions. The simulators are designed to be either experienced in a classroom or a virtual environment .

Award Winning Learning Experience.

We won the 2016, and 2017 Gold Award for Excellence in Learning from the Brandon Hall Group. We also won the Leadership Excellence Award from HR.com and ICT Project Award in 2019.

Our Client list is Impressive.

We invite you to visit our website, to view the list of clients and the industries that our Simulators have been adopted at. While you are at it, do review our Client testimonial videos too.
